

Instructions For Uploading Your Profile Images

Once the page is open, simply click on either option.

Instructions For Uploading Your Profile Images

After clicking on either of the two above options (Change Profile Photo or Change Cover Image) you will then be presented with an Upload Image Area in which you may **Drag and Drop Your Image** or Click to **Select Any Desired image From Your Local Drive**.

The screenshot displays the Active Moors profile page. At the top, there's a banner with the text 'BUILDING NATION' and 'ACTIVE MOORS'. Below the banner, the profile name '@activemoors' is shown with the status 'active right now'. To the left of the profile name is the Active Moors logo. To the right are buttons for 'Edit profile' and 'Profile settings'. Below the profile name, there are navigation tabs: Activity, Friends (10), Groups (1), Adverts (1), Forums, and More (5). The main content area is titled 'Change Profile Photo' and includes a sub-header 'View Edit Change Profile Photo Change Cover Image'. A message states: 'Your profile photo will be used on your profile and throughout the site. If there is a Gravatar associated with your account email we will use that, or you can upload an image from your computer.' Below this, there are two tabs: 'Upload' and 'Take Photo'. The 'Upload' tab is active, showing a dashed box for dropping a file and a button labeled 'Select your file'. A large green arrow points to the 'Select your file' button. To the right of the main content area is a 'Recent activity' section listing several updates and friend requests.

Instructions For Uploading Your Profile Images

Should you receive an upload Error message, the most common reason would be that your selected image is too large, and simply needs to be resized.

The simplest manner to resize an image is:

1.: Double Click on your image to open it in your image viewer, and use the viewer's Plus or Minus Magnifier to shrink your image.

After your image has been resized, simply re-take a picture of the smaller (downsized image) and Drag the new Smaller Image to your Edit Profile's Image Uploader Box as shown above.

Your image will at that point Upload and appear in your Profile Area as well as on, in and throughout other areas, as you navigate throughout ActiveMoors.com
